

SUNKARI LIKHITHA

Hyderabad, India

likhithasunkari@gmail.com | 7780434944 | LinkedIn

Professional Summary

Results-driven in Computer Science Engineering specializing in Artificial Intelligence and Machine Learning, with focus in developing UI/UX. Passionate about using Front-End Web Development features insights to enhance websites and web pages included. Learning the coding languages as C++ and Python. Using HTML and CSS for designing web pages.

Education

B.Tech in Computer Science Engineering (Specialization: AI & Machine Learning) –

Malla Reddy University 2025 – Present

Intermediate (MPC) – 93.1% — 2023 – 2025
Pragathi Junior College

CBSE – 82% — 2022 – 2023
Vivekananda Residential School

Technical Skills

- **Programming:** Python*
- **Data Handling:** SQL
- **Front-End Development:** HTML, CSS, JS, Bootstrap
- *Courses yet to be completed

Relevant Experience:

Hackathon September 2025

- Done a project using Python coding language and Mysql Database related to Student Management System.
- This project can add, delete or update the student details and can even track the students information which helps the management access easily.

Projects

College Attendance Tracker

- Built a responsive web application to automate student attendance management and improve academic monitoring.
- Developed features for attendance tracking, attendance percentage calculation, subject management, and real-time reports.
- Implemented role-based modules for students, teachers, and administrators with secure authentication.
- Designed an interactive dashboard and calendar-based attendance visualization for enhanced user experience.
- Integrated SQL database schema for efficient storage and retrieval of student, course, faculty, and attendance data.
- Ensured reliability through robust error handling, data validation, and scalable system architecture.

Online Blogging Platform

- Designed and developed a full-stack blogging platform for secure content creation and management.
- Integrated React frontend with Flask backend using REST APIs for seamless communication.
- Implemented user authentication system with login, registration, and session handling.
- Developed features for blog creation, editing, deletion, and comment management.
- Used MySQL database for secure storage and retrieval of user, blog, and comment data.
- Built reusable React components for responsive and interactive user experience.

Certifications

- Attended and received certificates in attending AI Masterminds.
 - Received a certificate for a workshop on “Design Faster with Figma -- Real Time UI Design & Collaboration”.
-
